

# Advanced Genetics Soybean Varieties

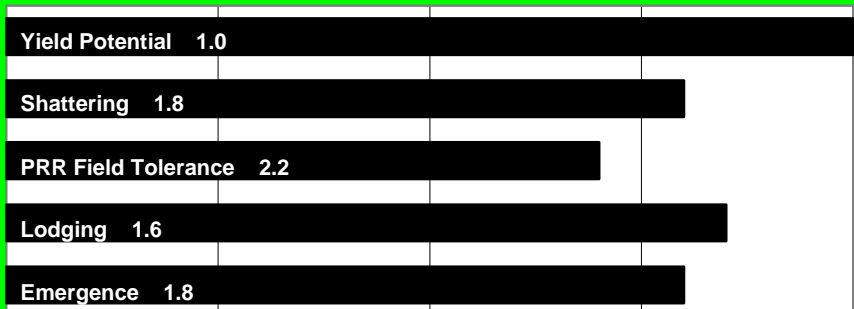

## AG 3822N R2Y

Maturity:	3.8
Height:	Medium +
Plant Type:	Narrow
Flower:	Purple
Pubescence:	Lt. Tawny
Pod Color:	Brown
Hilum Color:	Brown
Seed Size:	3000/lb.
Recommended Row Width:	Narrow or Wide
Phytophthora Race Resistance:	No gene
Cyst Nematode Resistance:	R3, MR14

AG 3822N R2Y is a new high yielding late group III variety from Advanced Genetics with the RoundUp Ready 2 Yield gene from Monsanto. AG 3822N R2Y is a medium height variety with an upright branching growth. AG 3822N R2Y may be planted early or late in narrow or wide rows. Due to its ability to handle stress and its terrific top-end yield potential, AG 3822N R2Y may be planted on any soil type with the expectation of excellent performance. It topped Monsanto's group III yield trials in 2008. AG 3822N R2Y offers outstanding protection from Soybean Cyst Nematode, excellent resistance to shattering, and terrific yield potential.
