

# Advanced Genetics Soybean Varieties

## AG 4041 RS

Maturity:	4.0
Height:	Med. Tall
Plant Type:	Med. Bush
Flower:	Purple
Pubescence:	Lt. Tawny
Pod Color:	Tan
Hilum Color:	Black
Seed Size:	3250/lb.
Recommended Row Width:	Narrow or Wide
Phytophthora Race Resistance:	No Gene
Cyst Nematode Resistance:	No Gene

AG 4041 RS is a high yielding early group IV variety stacked with the Roundup Ready gene from Monsanto and the STS gene from DuPont. This variety features exceptional field uniformity and appearance, good tolerance to Phytophthora root rot, tolerance to soybean cyst nematode, and strong emergence and shattering resistance. AG 4041 RS may be planted on any soil type dryland or irrigated with the expectation of very good performance. It is also a variety that may be drilled or planted in rows, and also an excellent selection for no-till or minimum tillage systems.

### Agronomic Traits and Disease Resistance
