

Advanced Genetics Soybean Varieties

AG 4544N RS

Maturity:	4.4
Height:	Tall
Plant Type:	Med. Bush
Flower:	Purple
Pubescence:	Lt. Tawny
Pod Color:	Brown
Hilum Color:	Black
Seed Size:	3000/lb.
Recommended Row Width:	Narrow or Wide
Phytophthora Race Resistance:	No Gene
Cyst Nematode Resistance:	MR3

AG 4544N RS is a new high yielding mid group IV variety from Advanced Genetics with the RoundUp Ready and STS traits stacked. AG 4544N RS is a tall variety with an upright branching growth. AG 4544N RS may be planted early or late in narrow or wide rows. Due to its height, AG 4544N RS is best suited to upland soils, however, it may be planted on any soil type with the expectation of top yield. It has topped our group IV yield trials for 3 consecutive years. AG 4544N RS offers outstanding protection from Soybean Cyst Nematode, excellent resistance to shattering, and terrific yield potential.

Agronomic Traits and Disease Resistance
