

Public Soybean Varieties

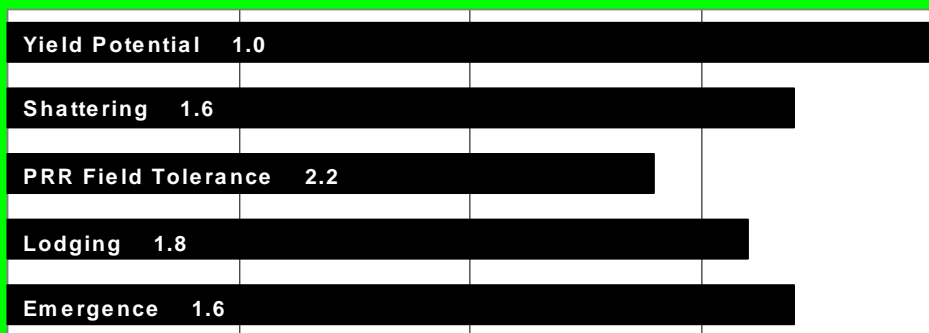

KS 5004N

Maturity:	5.0
Height:	Med. Tall
Plant Type:	Med. Bush
Flower:	White
Pubescence:	Gray
Pod Color:	Tawny
Hilum Color:	Imp. Brown
Seed Size:	3100/ lb.
Recommended Row Width:	Narrow or Wide
Phytophthora Race Resistance:	None
Cyst Nematode Resistance:	R3, MR14

KS 5004N is a new early group V from Kansas State University. This variety features good resistance to Soybeans Cyst Nematode and Soybean Mosaic Virus. KS 5004N is a medium-tall height with excellent standability. This is a high yield variety that has averaged a little over 3 bushel per acre more than the popular Manokin variety. KS 5004N has excellent adaptation to southeastern Kansas and should capture a large percentage of the non-GMO acres. It may be planted early or late on any soil type.
