

# Advanced Genetics Soybean Varieties

## AG 5333N RR

Maturity:	5.3
Height:	Medium
Plant Type:	Bushy
Flower:	White
Pubescence:	Gray
Pod Color:	Tan
Hilum Color:	Buff
Seed Size:	3100/lb.
Recommended Row Width:	Wide
Phytophthora Race Resistance:	None
Cyst Nematode Resistance:	R3, MR14

AG 5333N RR is a new high yielding early group V variety from Advanced Genetics with the RoundUp Ready gene. This variety offers very good resistance to Soybean Cyst Nematode, good standability, and outstanding yield potential. AG 5333N RR may be planted on any soil type, however, due to its bushy growth, it is perhaps best suited to wide rows. Emergence and shattering scores are excellent and yield performance has been outstanding. AG 5333N RR is a very uniform, attractive variety in the field. Should you try just one new variety this year, AG 5333N RR is the best candidate.

### Agronomic Traits and Disease Resistance
