

Advanced Genetics Soybean Varieties

KS 5507N RR

Maturity:	5.4
Height:	Medium
Plant Type:	Med. Bush
Flower:	Purple
Pubescence:	Gray
Pod Color:	Brown
Hilum Color:	Black
Seed Size:	3300/lb.
Recommended Row Width:	Narrow or Wide
Phytophthora Race Resistance:	None
Cyst Nematode Resistance:	R1, R3, R4, R14

KS 5507N RR is a new high yielding group V variety developed by Kansas State University with the RoundUp Ready® gene. This variety offers excellent resistance to Soybean Cyst Nematode. It has the Hartwig source of resistance and is resistant to all races of SCN currently found in Kansas. KS 5507N RR offers good standability, and outstanding yield potential. It may be planted on any soil type in narrow or wide rows. KS 5507N RR is an excellent selection for those producers looking for top yields from a full season variety. It has a very attractive, uniform field appearance and good stress tolerance.

Agronomic Traits and Disease Resistance
